Recovery in all divisions led by higher price realization

Profit guidance raised for FY2022

On the back of good volumes and higher sales prices, the company expects to report an EBIT of around CHF 50.0mn for 1H2022. Consequently, the company has also raised the guidance for FY2022. However, weak macroeconomic conditions and geopolitical uncertainties may weigh on the sustainability of the improvement in the financial performance, which was largely supported by some one-off positive impacts.

Group: Group net sales are expected to increase in FY2022 as all divisions were able to pass on the higher costs of raw materials to their various markets during 1H2022 and also recorded higher volumes. As a result, net sales are projected to improve across all three businesses, with expectations of total net sales of around CHF 360mn in 1H2022. As mentioned above, on profitability the Group guides for an EBIT of CHF 50mn in 1H2022, of which CHF 30mn are expected to come from Paper. We expect the 1H2022 contribution from Packaging and Chemistry to be similar, thus we project CHF 10mn for each. On the basis of the positive trend in 1H2022, we have raised our revenue growth estimate for FY2022 to 26.0% (previously: 16%), resulting in total FY2022E net sales of CHF 627mn (previously CHF 533mn), although management stresses that visibility currently is very low due to the known geopolitical situation and uncertain economic outlook. Still, the Group expects to report a high double-digit (previously: mid double-digit) number for EBIT and net results. On the back of the positive guidance surprise, we have also revised our FY2022 estimates for EBIT and net results to CHF 83.3mn and CHF 70.4mn (previously: CHF 52.0mn and CHF 49.7mn) respectively.

Paper: The division's top line has been positively impacted by price increases as well as certain one-off events in 1H2022, alleviating demand-supply imbalances which was beneficial to the company's operations. Prices among others also benefited from a month-long strike at one competitor's facility and a reduction in production capacity, as Stora Enso announced the intended sale of four of its five paper factories. While these one-offs have resulted in higher pricing power for CPH's Paper division in 1H2022, prices going forward are expected to soften as the strike at UPM is now resolved and with their operations onstream again, adding to supply. Owing to the higher demand, CPH's paper production is also running at full capacity at the moment. Consequently, the division expects to report EBIT of CHF 30mn in 1H2022 and also a double-digit-EBIT for the year.

Packaging: The division is expected to report improved net sales in 1H2022 and also for the year driven by good demand. Moreover, the new coating plant in Brazil is expected to become operational shortly, but the impact of this on the topline is yet to be ascertained in 2H2022. However, due to raw material supply constraints and possible overstocking by certain clients, we expect some fluctuation in the top-line between the two half years.

Chemistry: The product demand has been improving based on favourable business trends. Thus, also here we expect higher sales and EBIT results in 1H2022. The division over the last years has substantially reduced its cost structures thanks to relocating capacities. Moreover, the capacity expansion will eventually impact positively on the top line going ahead. The division is set to invest in the additional capacities at its sites in the USA, China, Bosnia and Herzegovina, and Switzerland.

FY2022 Guidance:

Management expects higher sales for all three business divisions and raised the following financial targets for FY2022:

- Group EBIT and net result in the high-double-digit millions
- Chemistry Division: Improvement in EBIT
- Paper Division: Higher sales and a double-digit million EBIT, supported by lower depreciation
- Packaging Division: On track to record a double-digit-million EBIT

Valuation and conclusion

We value CPH using DCF and relative valuation techniques. Our intrinsic value of CHF 92.3 per share, which is same as our last estimated target price (CHF 92.3) implying an upside of ~28.5% from current levels. For relative valuation, since the Group operates in three entirely different divisions, we compare each of CPH’s divisions with different sets of relevant industry peers. We have employed three parameters – EV/EBITDA, P/S, and P/E – to analyze the relative valuation of the Group. CPH currently trades at a P/S multiple of 0.7x (CY2022E), a significant 60% discount to the weighted average multiple of division peers.

All the three divisions are expected to report improved net sales, as it was largely able to pass on the higher costs of its raw materials to its various markets across the business segments. The Paper Division was benefitted by certain one-off situations that led to short term imbalance in the market, the division is expected to report improvement in profitability and register a high double-digit-million EBIT this year, but the performance will stabilize going forward. Moreover, the operating result of the Packaging Division is also expected to improve. With improvement in bottom-line at group level along with net sales and the cost optimisation efforts are expected to offer a required boost to the company’s stock price. However, there could be some headwinds in the 2H2022 due to the low visibility and uncertain outlook.

DISCLAIMER

CPH Chemie + Papier Holding AG ("CPH") is a client of Research Dynamics. The equity research report(s) are prepared for informational purposes only and are paid for by the company portrayed in the report. Research Dynamics is a division of Dynamics Group AG. Dynamics Group is an independent consultancy firm focused on strategic advisory, communication management and research and analysis.

This report (henceforth known as "document") has been drafted by the authors concerned as a non-binding opinion on the market situation and on the instruments of investment in question and compiled by Dynamics Group in order to provide background information about the companies. It is intended exclusively for the purpose of information.

Dynamics Group has not individually verified the information and data on which this document is based. All information and data in this document originate from generally available sources which the author concerned or Dynamics Group viewed as reliable at the time of drafting this document. However, no liability can be assumed for their correctness, accuracy, completeness and appropriateness – neither expressly nor tacitly. The contents of this document do not represent an assurance or guarantee by the authors concerned or Dynamics Group. Forward-looking information or statements in this document contain information that is based on assumptions, forecasts of future results, estimates of amounts not yet determinable, and therefore involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of their subject matter to be materially different from current expectations

Dynamics Group shall not be liable for any consequential damage to properties – on whatever legal grounds it may be. Liability of Dynamics Group on account of premeditation or gross negligence shall remain unaffected by this.

Dynamics Group has no permission to provide assurances or assume guarantees on behalf of the companies or a third party mentioned in this document. Neither the companies mentioned in this document nor any other individual assumes liability for any loss, damage or detriment that may result from the use of this document, especially when taking decisions on investments, or from other reasons. Dynamics Group cannot be held responsible for detrimental consequences that occur or may occur due to the use or its omission based on the views and inferences contained in this document. Past performance trends of value, price or rates do not provide any indications to the future trends for an investment. Dynamics Group does not provide any guarantees for the suggested yield or the achievement of referred targets.

This document does neither represent an offer of purchase, holding or sale of any securities, money market instruments or of derivatives, nor does it contain the basis for a contract or a commitment of any kind. Every investment, for example, in debentures, shares and options, is associated with enormous risks. A decision on investment with regard to any security may not be based on this document. This document is neither an advice on investment, nor a recommendation or invitation for purchasing, holding or selling any securities, money market instruments or derivatives.

Dynamics Group does not conduct any investment business and, accordingly, does not itself hold any positions in the securities mentioned in this document. However, the respective directors, employees and contractors of Dynamics Group may hold positions in the described securities and/or options, futures and other derivatives that are based on these securities.

This document has been provided to you for information only. It may not be reproduced or distributed to others or published in any other form partially or fully.

The distribution of this document and the information contained therein may be restricted in other jurisdictions by law and persons who may come into possession of this document must be aware of possible restrictions and adhere to the same. Failure to comply with such restrictions may constitute an infringement of the laws in USA or Canada governing the securities or of the laws of any other jurisdiction.

This study is protected by the copyright laws. It may be used only for the purpose as defined in this disclaimer. Portions of the study, if quoted, must be acknowledged by indicating the source. Any use other than this shall require prior written permission by Dynamics Group. Reproduction, circulation, publication and provision of online access to the document shall be regarded as its use and the same shall require permission. Circulation of this document, especially in a foreign country, may be permitted only under the provisions of the disclaimer and the applicable regulations. Unauthorized use of the study or omission of details of the source or the acknowledgement of copyright may lead to initiation of a civil suit for damages and be liable for prosecution.

If any part or individual formulations of this disclaimer are found to be unsustainable or become unsustainable at a future date, the rest of the contents and their validity shall not be affected by it.
